HR Notices From March 26-28

ImageSoft Promotes Smith to Business Analyst Manager: Southfield-based ImageSoft Inc. has promoted Toni Smith to business analyst manager. She had been a senior business analyst. In her new role, Smith oversees the discovery, design and training processes for ImageSoft's customers across all vertical markets including insurance, government, the courts, health care and educational institutions, and manufacturers. Additionally, she helps translate customer needs to the company's technical team and also leads ImageSoft's business analyst team. Smith has worked in the software industry for over 25 years, including eight years focused on document management software. Before joining ImageSoft in 2005, her career included teaching, consulting, and technical resource planning in claims, underwriting, accounts payable, human resources, health care, small business and educational arenas. Smith came to ImageSoft from FinCor Solutions in Lansing, where she served as senior IT director. Prior to that, she was director of information systems at Michigan Construction Industry Mutual, also in Lansing. She holds a bachelor's degree in computer science from Mid-America Nazarene University. Founded in 1996, ImageSoft serves customers throughout the United States, Canada and Mexico. Inc. Magazine named ImageSoft one of the Fastest-Growing Privately Held Companies and in 2008, the Edward Lowe Foundation cited ImageSoft as a Michigan 50 Companies to Watch. Karmanos Cancer Institute Announces Staff Changes

Dr. Gerold Bepler, president and CEO of the Barbara Ann Karmanos Cancer Institute, announced Friday leadership changes that are effective immediately.

* Ann G. Schwartz assumes the position of Deputy Center Director and Executive Vice President of Research and Academic Affairs. Schwartz served as interim President and CEO of Karmanos prior to Bepler's arrival. She also served as the Associate Center Director for Population Sciences at Karmanos since 2002. Her research focuses on the genetics underlying lung cancer risk. She has an M.S. in Biology from Wayne State University, an MPH in Environmental Health from the University of Michigan and a Ph.D. in Epidemiology from the University of Michigan School of Public Health.

* Terrance Albrecht continues as the permanent Associate Center Director for Population Research. Albrecht joined Karmanos in 2003 and most recently led the Communication and Behavioral Oncology program. She also served as co-leader of the Population Studies and Prevention program. During her time at Karmanos, she has conducted in-depth analyses of the way oncologists communicate with patients to make the work of researchers and scientists even more effective.

* Dr. Patricia LoRusso is the Director for the new Center for Experimental Therapeutics. Dr. LoRusso developed the Phase I program at Karmanos, one of only 14 National Cancer Institute-funded Phase I programs in the United States and Canada, and the only such program in Michigan. Dr. LoRusso is recognized as an international expert in early phase clinical research. She has been awarded prestigious grants from the NCI and the Michigan Economic Development Corporation, and serves as Co-Chair of the NCI's Investigational Drug Steering Committee.

* Dr. Anthony Shields continues as the Associate Center Director of Clinical Research. Dr. Shields is a well-recognized physician-scientist who works in the area of anti-cancer drug assessment. He earned his Ph.D. in cell biology from the Massachusetts Institute of Technology and M.D. from Harvard University. His principal expertise resides in the use of Positron Emission Tomography imaging to evaluate the selective pharmacologic and physiologic effects of new anti-tumor agents.

Google fiber is not lacking in

* Wei-Zen Wei is the new Associate Center Director for Basic Research. Known as a passionate and tenacious researcher, Dr. Wei has worked on cancer-fighting vaccines since 1996 to help prevent HER2-positive breast cancer, which accounts for 20 to 30 percent of cases and is characterized by tumors that grow faster and are more likely to recur. Her lab was the first to develop the HER2 DNA vaccine, which was tested in the laboratory on tumors that no longer responded to other HER2-positive breast cancer therapies. The vaccine helps to educate the immune system to recognize HER2-positive cancer cells, helps destroy the cells and prevents them from spreading.
